

### Painting the "N"

This week members of Student Senate came together to paint the "N" on the hill on the south end of campus. The large "N" was constructed in 1965. It was designed by architect Tobias Stapleton and was built by the campus with funded by the students. Harold Babcock, an Assistant Professor and

Superintendent of the Physical Plant and Dale Anderson, an instructor in Drafting, supervised the construction of the "N".

### Recycling Facts & Tips

Use your printer wisely. You can save paper by printing on both sides of the page. Many professors don't mind if you turn in a paper like this-- just ask first. Save pages that you've printed and use the backs to print out drafts and other things you don't have to turn in. In addition, many printers have multiple settings for print quality. Use the high quality print setting for things that have to look nice, but use the low quality setting for things that don't. This will save ink. While you're at it, consider cutting down on the things you print. Do you really need to print that web page, or can you just bookmark it?
