THE VALUE OF YOUR DESIGN DRAFTING DEGREE

MSU-Northern's Industrial Technology programs offer students a chance to work alongside engineers and engineering departments to develop products such as automobiles, power sports equipment, toys, and everything in between.

With some of the most hands-on classes on campus, our Industrial Technology programs train graduates to use their education to recognize and find real solutions to engineering problems. Students will design, prototype, test, and manufacture real-world parts, tools, and systems in order to be prepared to enter the manufacturing sector.

WANT TO GRADUATE ON TIME? SAVE MONEY? GET BETTER GRADES?

15

You're going to need 15. That's the number of credits you need to take each semester to graduate on time. Sure, you can take less and still receive some scholarships and funding. But unless you take 15 credits a semester (or 30 a year), you're looking at an extra year or more in order to graduate. Know the courses you need to graduate, and meet with your advisor to map out a plan to earn your degree on time.
